How to do Business with OhioHealth in 2024

OhioHealth will simplify the provider experience in 2024 through the transition to a single claims administrator. Effective January 1, 2024, OhioHealth will Transition to a new claims platform and we want you to be ready! Watch for more information soon about how to do business with OhioHealth in 2024.

In-Network Referrals Keep Costs Down

We appreciate your commitment to caring for OhioHealth patients. Should you have a member that needs to see additional providers due to their condition, we ask that you be mindful to refer within Tier 1. This helps our network be good stewards of our healthcare resources. You can identify Tier 1 providers on our website [here](#).

New Pharmacy Benefit Manager in 2024

OhioHealth is committed to helping our members manage the cost of their prescription medications and accessing convenient in-network pharmacies. We will partner with Navitus in 2024 as our new Pharmacy Benefit Manager (PBM). Further drug cost reduction can be delivered by adhering to our high-performance formulary that offers lower-cost alternatives like generics or less expensive brand name drugs when clinically appropriate. Starting in 2024, providers will have access to our formulary and prior authorization criteria by logging into our provider portal at prescribers.navitus.com.

OhioHealthy Specialty Medication List Updates

The latest group of medications reviewed that were new to the market in the previous 12 months can be found [here](#). The prior authorization lists for both medical and pharmacy specialty medications are posted in the Drug Authorizations section.

All medications are reviewed for formulary addition or exclusion after the first year on the market.
